Rale Nikolić was graduated at the Department of Mathematics of Faculty of Science, University of Kragujevac in 1999. He earned Magister of Science thesis in 2006, and earned Ph.D. thesis entitled "*Fixed point theorems in spaces with nondeterministic distance*" in 2012 at the Department of Mathematics of Faculty of Science, University of Kragujevac. Firstly, Rale Nikolić was working at the Faculty of Technical Science, University of Kragujevac, as a teaching assistant. After that he was working at Military Academy, University of Defense as a teaching assistant, also and at Faculty of Mathematics, University of Belgrade as a scientific assistant. From 2012 to 2017 he taught at Belgrade Metropolitan University as an assistant professor. From 2017 onwards he has been teaching at Belgrade Metropolitan University as an associate professor. His interests in research are Nonlinear Functional Analysis, Fixed Point Theory and Fuzzy Theory. He is author and co-author of certain number of papers published in scientific journals from the field of his research interests. Also, he participated and presented his research results at many conferences devoted to mathematical analysis and its applications.

From September 2020, Rale Nikolić has been participating in the project *State graduation exam* as a non-key expert. Project activities have been funded by the European Union with the goal to support public institutions in changing the final high school exams and the way high schools graduates enrol in universities.
